MEMORANDUM FOR THE DEPUTY DIRECTOR OF CENTRAL INTELLIGENCE

SUBJECT: Community Data Processing Support for Capabilities
Programming and Budgeting (CPB) (U)

1. (U) The requirement outlined in your memorandum of 22 February is a complex problem which I regret cannot be fully resolved in time to meet your 1 August operational goal. I believe that the first objective of our staffs should be to develop a more complete and detailed specification, decide the relative priorities of the various capabilities required, and evaluate the potential of existing systems and software. Then a system concept and phased implementation schedule can be developed, along with alternative approaches that may result in a limited capability for the FY 1984 budget cycle.
